

Spring Water Symposium

Resilience and Reuse

Monday, May 23, 2016 12:00 p.m. to 6:00 p.m.

Intuit, Cook Campus Center, Mountain View, CA 94043

Dear Friend,

As the new Executive Director, I'm honored to have the opportunity to lead Sustainable Silicon Valley. The past several months have been a time of change and renewal, and as SSV enters a new era, the organization has a clear purpose and momentum.

SSV Team

Thank you to everyone for coming together during the transition period. Special appreciation to SSV's members for their patience as we successfully pivoted to a project-based organization; the Board for their enduring commitment; the executive team, especially Chief Development Officer Cindy Clark; and SSV's dedicated volunteers.

With guidance from thoughtful SSV members, I'm pleased to let you know that SSV has honed the Net Positive Bay Area 2050 goals so that they are both audacious and realistic. SSV envisions a Net Positive Bay Area by 2050 with the goals of:

- Generating more renewable energy than we consume
- Sequestering more carbon that we emit
- Ensuring water resilience by enabling reuse

SSV's new team is delighted to announce our [Spring Water Symposium: Resilience and Reuse](#) on **Monday, May 23, 2016** at **Intuit's Cook Campus Center** in Mountain View. This event supports SSV's Intelligent Water REuse Initiative by showcasing projects, providing stakeholder education, and detailing updates on policy. The dynamic Steering Committee is collaborating with SSV's water team to create an engaging and inspiring event.

I invite each of you to the Symposium to learn about innovative water opportunities and to meet SSV's new team. Your personal presence matters

as it signals a commitment to SSV and our shared mission. Please contact me directly with your ideas and suggestions as we move forward.

Sincerely,
Jennifer Thompson
Executive Director
Sustainable Silicon Valley
