

Spring Water Symposium

Resilience and Reuse

Monday, May 23, 2016 12:00 p.m. to 6:00 p.m.

Intuit, Cook Campus Center, Mountain View, CA 94043

Greetings!,

This spring has been a busy time for SSV. On Thurs., April 27, SSV hosted a panel at the California Water Environment Association's (CWEA) Annual Conference at the Santa Clara Convention Center. The panelists presented technological opportunities in onsite wastewater reuse and discussed the technical, regulatory and monitoring challenges. The presentations were engaging and the discussion lively, with great audience participation.

SSV panel at CWEA - Peter Haase, Acqualogic; Dr. Sebastien Tilmans, Codiga Center; (moderator) Bob Hitchner, Nexus eWater; Drew Wenzel, Google

With a grant from Mitsubishi Corporation (Americas), SSV facilitated replacing a 30-year old roof at the Ecumenical Hunger Program as part of SSV's Net Positive Communities - East Palo Alto Project. EHP is a nonprofit that assists local residents who are experiencing hardship by providing food, clothing, and support. The new roof, installed in April, is a 'cool' roof that reflects sunlight and mitigates heat absorption. Along with the cool roof, new foam insulation was installed to help the building maintain a stable temperature. SSV's work at EHP is a showpiece for the community on energy efficiency, education, and community building.

Currently SSV is focusing on preparations for our **[Spring Water Symposium: Resilience and Reuse](#)** at Intuit's Cook Campus Center in Mountain View on Monday, May 23. We're thrilled to learn about Intuit's employee engagement program and to have the support of Facebook, Google, West Valley College, GE, and many other sponsors. This is a great opportunity to learn about expanding our water supply through water reuse, hear inspiring case studies, and discuss the future of water in California. We hope you'll join us. Be sure to check out Intuit's new sustainability [website](#) before the event.

Sincerely,
Jennifer Thompson

WATER SYMPOSIUM REGISTRATION

The Spring Water Symposium: Resilience and Reuse, on Monday, May 23 will bring together prominent water technology experts with key government, water agency, and corporate leaders. The event will showcase a range of design and technology systems for for treating, monitoring, and reusing water. Join us!
